Introducing Fill Pro

High-capacity, powerhouse dispenser combines speed, style and precision.

- BRITA's most powerful water dispenser with the highest cooling capacity – perfect for busy restaurants, bars, hotels, large offices and events
- Choice of four refreshing water types: unchilled and chilled still, chilled semi-sparkling and sparkling
- Stylish, brushed stainless steel cased unit as a countertop or freestanding installation with no unsightly tanks, bottles or hoses
- Precision vessel positioning on drip tray guides and accurate portion control without a drop of water waste. Hit the button, walk away, collect
- TwinFilling doubles service efficiency by filling two bottles or glasses simultaneously

Product compliant with
Reg. EC No 1935/2004

Fill Pro

High-capacity, powerhouse dispenser combines speed, style and precision.

reddot winner 2021

TwinFilling efficiently fills two bottles/glasses simultaneously

Our water dispensers produce 86% less CO₂ emissions than pre-bottled water and 64% less than bottled water dispensers

BottleGuard to easily position bottles/glasses on the drip tray for precise filling

SmoothFinishing portion control to fill bottles/glasses without overflow

ThermalGate™ powerful thermal-disinfection feature

BRITA CLARITY Protect filter preserves minerals in water while removing unwanted substances

The wonder of water

Better water, enhanced well-being.

Water is a dissolver extraordinaire: when rain falls, it soaks through the ground, gathering organic matter and minerals. Together with residues from treatment and piping, these affect the taste, appearance and smell of our drinking water. For better, or for worse.

At BRITA, we are dedicated to optimising the composition of drinking water. When water looks, smells and tastes just right, we're encouraged to drink more.

“ Good hydration is the basis for our body's metabolic processes and for our health. And staying hydrated is easier if water tastes good. That's why BRITA has a special department dedicated to taste.

Birgit Kohler

Head of BRITA's Organoleptic Department, certified Water Sommelier

Filtration power for your needs

With BRITA's proven filtration solutions, you can be sure of excellent water - meeting the highest hygiene, quality and environmental standards.

Activated carbon

Reduces substances that impair taste and odour.

Ion exchanger

Reduces limescale and metals, e.g. lead.

Membrane

Filters out bacteria and cysts

Whatever the composition of the local mains water at your organisation, you'll find an effective filtration solution at BRITA. From activated carbon to ion-exchange resins, pre-filters, post-filters, double-layer and hollow fibre membranes, we have over half a century's expertise built into each of our BRITA filtration and treatment solutions, and our BRITA water dispensers.

With BRITA, you can be sure of Made-in-Europe quality. All our filters are manufactured in Germany, and BRITA water dispensers are assembled in our production facility in Italy. We take care to produce sustainably wherever possible. For example, we use coconut shells for our activated carbon.

You can be sure of excellent water - meeting the highest hygiene, quality and environmental standards as well as delighting the tastebuds - with proven filtration solutions from BRITA.

Benefits of BRITA filtration technology

When dispensing cold still or sparkling water:

- refreshing water with improved taste, every time
- reduced cloudiness for crystal-clear drinking water
- reliable dispenser operation, outstanding safety and hygiene

When dispensing hot water:

- development of full, rich aroma and flavour for tea
- protection against limescale build-up to maximise your machine's lifetime and performance

The CLARITY Protect 1 water dispenser filter ensures exceptionally clean water

Mains water is strictly monitored, but some bacteria, metals, microplastics and organic impurities could remain or be introduced, via piping for example. CLARITY Protect keeps these unwanted germs and particles out of your drinking water, and also reliably reduces treatment residues, such as chlorine, that affect its taste and smell.

Hot water filtration with PURITY C Dispenser 2 filter

The PURITY C Dispenser filter protects the dispenser by reducing water hardness, tackling the common problem of limescale. It also removes unwanted, taste-impairing substances. And with its bypass settings, you can control the degree of hardness – just the right amount, for instance, to prepare a perfect cup of tea.

CLARITY Protect

Water filter: Reliably safe, excellent water for your dispenser.

Mains water is strictly controlled. But healthcare and similar environments where hygiene is of the utmost importance demand an extra level of safety. CLARITY Protect delivers this through multi-stage filtration, rather than a single activated carbon filter. CLARITY Protect sets the industry benchmark from the first stage of filtration to the moment your glass is filled with crystal-clear, refreshing water. We offer you over 50 years of filtration expertise in our “standard” filter.

CLARITY Protect reduces:

The right balance
Preserves minerals in water

Activated carbon filtration
Reduces substances that impair taste and odour

Pre-filter
Removes particles

Hollow fibre membrane
Filters out 99.999% of bacteria and 99.95% of cysts

Filter capacity:
Protect: 11,500 l

Exceptionally clean, safe water

Protects equipment
lowering dispenser maintenance costs

CLARITY Protect

Technical data

Model	BRITA CLARITY Protect 100
Technology	activated carbon and hollow fiber membrane filtration
Water intake temperature	4°C to 30°C
Ambient temperature for operation	4°C to 40°C
Ambient temperature for storage / transport	-20°C to 50°C
Water inlet and outlet connection	JG 8 mm
Operating pressure	2 bar to 8.6 bar
Flow rate at 1 bar pressure loss	180 l/h
Nominal filter capacity	11,500 l
Operating position	horizontal or vertical
Efficacy	
Reduction of particles such as micoplastics or sand	≥ 0.5 µm (NSF 42, Class I)
Reduction of asbestos fibres	> 99.9% (NSF 53 tested by independent laboratory)
Reduction of metals such as lead	> 90% (DIN EN 14898)
Reduction of chlorine	> 90% (DIN EN 14898, Class I) and > 50% (NSF 42)
Reduction of organic impurities such as benzene	> 90%
Reduction of pharmaceuticals, pesticides and hormones such as naproxen, lindane, estrone	> 90% up to at least 8,000
Reduction of bacteria	99.999% (ASTM F838-05)
Reduction of cysts	99.95%(NSF 53)
Dimensions (W x D x H)	
Filter system (filter head with filter cartridge)	68 x 68 x 338 mm
Filter cartridge	68 x 68 x 311 mm
Installed dimensions (vertical installation with wall mounting bracket)	68 x 74 x 371 mm

BRITA ThermalGate™

Hygiene feature: The powerful thermal disinfection solution from BRITA.

The tap is automatically heated to over 125°C at regular intervals for thermal disinfection.

ThermalGate™
Protects against
retrograde contamination.

ThermalGate™ is continuously active,
providing protection not only at peak
times, but also during periods of inactivity
e.g., at night or on weekends

Does not require manual
effort or chemical additives

Developed through over 20 years'
experience in the healthcare market

Filtration: the power of reduction

Reduces fine particles e.g., microplastics

Microplastics are plastic fragments smaller than 5 mm. They are found in mains water:

- primary microplastics e.g., cosmetics, facial scrubs, and cleaning agents
- secondary microplastics e.g., from the degradation of plastic products and car tyres

Reduces particles e.g., sand

Particles in tap water come mainly from deposits in piping. They include a mixture of limescale, gypsum, silicates (sand), and rust from pipe corrosion. Pressure surges or simply the normal flow of water can dislodge particles.

Reduces metals e.g., lead

Metals are not usually found in mains water but can be introduced via corroding pipes. Residential piping can be made of galvanised steel, copper, stainless steel, brass – and in rare cases, lead. Water stagnation in plumbing can raise the concentration of metals above specified limits.

Reduces chlorine / chlorine compounds

During mains water treatment, chlorine and chlorine compounds are added in the lowest quantities possible – ideally below the odour threshold. However, higher levels of chlorine may be needed for long-distance transmission. Chlorine can also form compounds with organic substances, with a negative effect on water's taste and smell.

Reduces organic contaminants

Organic contaminants include various chemical compounds – from industrial substances, such as solvents like benzene, to medicine and pesticide residues, to natural organic compounds. These can enter mains water via emissions.

Reduces water hardness

During the water cycle, rain absorbs CO₂ in the air, becoming slightly acidic. Rainfall dissolves minerals, such as calcium carbonate, in the ground. This raises water's carbonate hardness. Too many minerals in water can affect the taste of beverages, and lead to limescale deposits in equipment.

Reduces bacteria and microbial cysts

Mains water is clean – but not sterile. It is treated to meet established microbiological standards. However, as water is transported via the mains, germs can multiply. This is especially true of stagnant water.

Reduces pharmaceuticals

Pharmaceutical and hormone residues, and their by-products, can enter the environment via wastewater. Very small quantities can then end up in mains water. Water is regularly tested for naproxen, lindane and estrone, as these substances are particularly common.

Reduces asbestos fibres

Asbestos is a heat-resistant fibrous silicate mineral. It has been widely used e.g., as insulation, as an anti-corrosion coating and, in the past, as a building material. Asbestos fibres can enter water via piping, including asbestos-cement pipes (which were permissible in the past) and coated pipes.

Efficiency on-tap

Use case refrigerator: 365 days, annual energy consumption of various selected devices (according to Energy Label) = 1.1 kWh/day

Use case BRITA Extra C-Tap (medium boiler): 10 l hot water and 60 l cold water + stand-by energy consumption; night mode for 9h = 2.24 kWh/day

Use case kettle: 10 l hot water required, due to water wastage (assumption 0.2 l per cup 18 l); 0.1 kWh energy consumption per litre = 1.8 kWh/day

Use case coffee machine: Assume that each employee consumes 3 cups of coffee per day = 2.7 kWh/day

Can our signature hot-and-cold water dispenser really be more energy-efficient than a simple kettle? We've put the BRITA Extra C-Tap to the test.

We did the sums for a typical office kitchen used by 50 employees, over 250 working days. And the results are clear: a typical kettle consumes 1.8 kWh/day, which costs €180 per year (based on 10l per day requirement for hot water, takes into account wastage so 18l usage per day)*

BRITA Extra C-Tap consumes 2.24 kWh/day, which costs €224 per year, including stand-by (Based on usage 10l hot water, 60l cold water per day)*

And the BRITA Extra C-Tap doesn't only dispense hot water – you've also got a choice of water types. There's unchilled and chilled still, and chilled semi-sparkling and sparkling. All on-tap!

*assumption: €0.4 per kWh

Not yet another appliance, gobbling up energy?

Quite right. BRITA water dispensers are not that greedy when it comes to energy consumption.

We've done the sums. Take the BRITA Top Pro, our classic versatile water dispenser for business. In a typical office kitchen used by 50 employees, over 250 working days, it uses a modest 0.6 kWh per day (Based on 60l/day usage and stand-by energy consumption), which works out at just €60 per year.*

That's considerably less than a typical coffee machine, dishwasher, fridge, kettle or even microwave.

Use case refrigerator: 365 days, annual energy consumption of various selected devices (according to Energy Label) = 1.1 kWh/day
 Use case dishwasher: Energy consumption per rinse (according to Energy Label, range from B-D); 2 rinses per day = 1.5 kWh/day
 Use case kettle: 10 l hot water required, due to water wastage (assumption 0.2 l per cup 18 l); 0.1 kWh energy consumption per litre = 1.8 kWh/day
 Use case microwave: 800W power; 2 min per meal; 25 meals per day = 0.66 kWh/day
 Use case coffee machine: Assume that each employee consumes 3 cups of coffee per day = 2.7 kWh/day
 Use case BRITA Top Pro (high cooling capacity): 60 l cold water per day + stand-by energy consumption; night mode for 9h = 0.6 kWh/day

*assumption: €0.4 per kWh

Our accessories

Find the match for your dispenser.

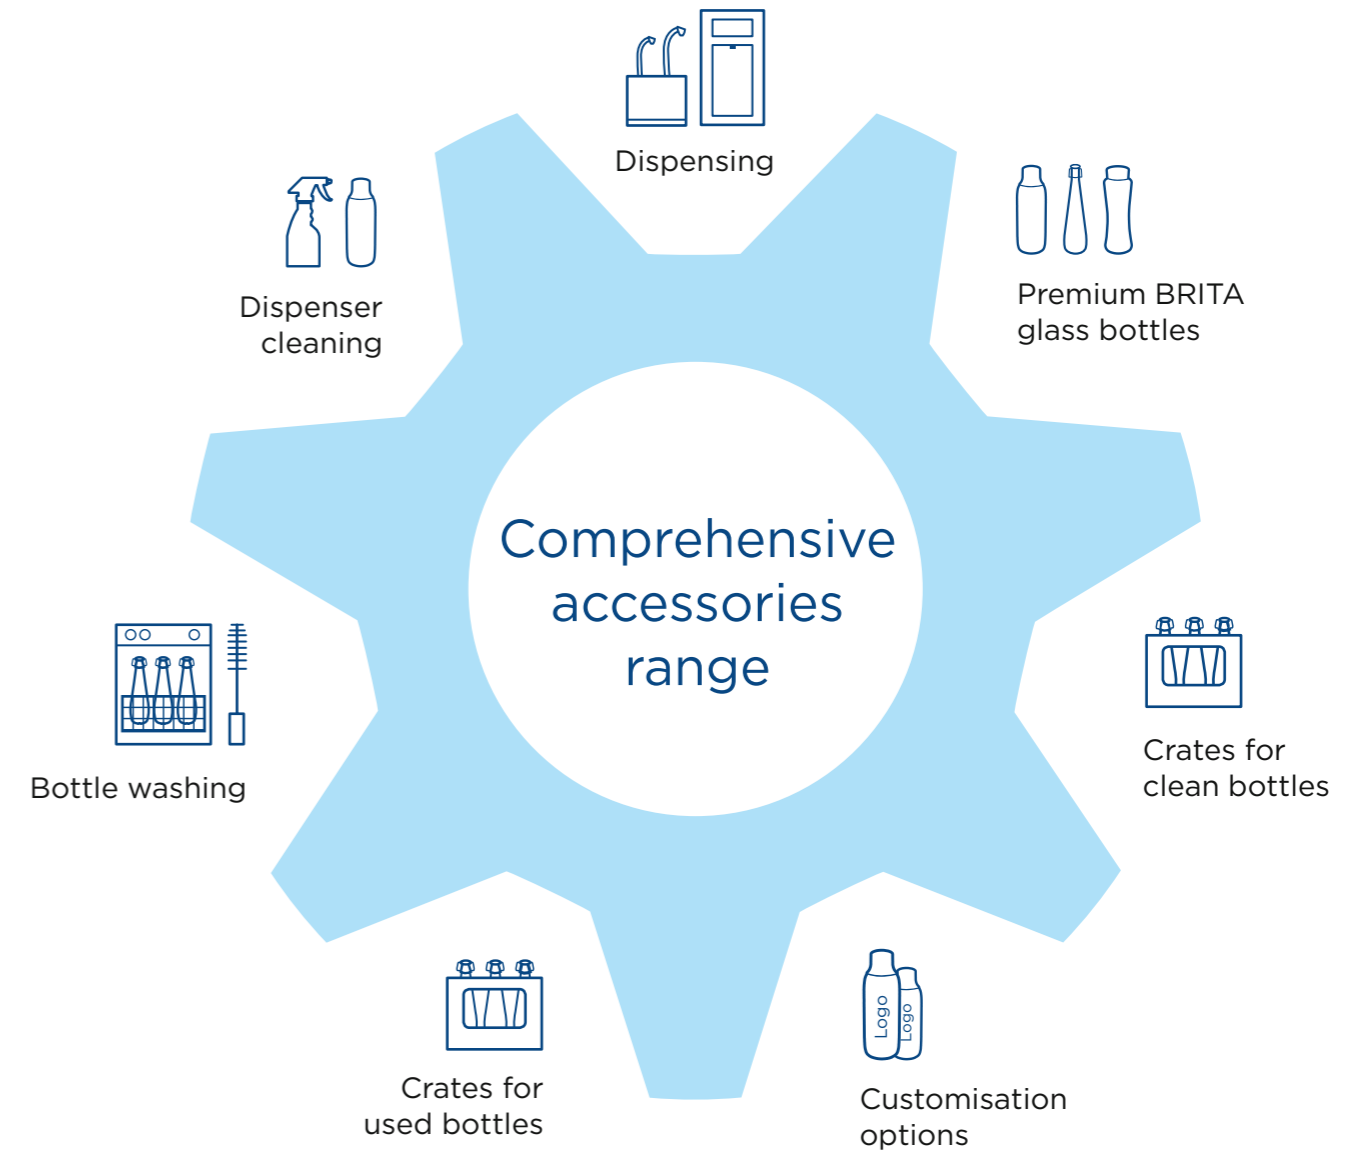

BRITA products don't stop with water dispensers and filters. We offer a comprehensive range of accessories to cover all your drinking water needs from dispensing to serving to cleaning.

Our premium quality bottles are easily refilled via our dispensers. They're customisable, too. Full or empty, they can be stored in crates specially designed for the various bottle types. As hygiene is a top priority, we supply everything you need to sanitise your BRITA dispenser and clean BRITA bottles. We offer a choice of bottle washing trays, compatible with professional and domestic dishwashers.

Our best-practice tip? We recommend cleaning your BRITA dispenser daily for extra peace of mind.

Looking for ways to reduce your carbon footprint?

Replacing plastic bottles with long-lasting BRITA bottles and corresponding accessories is an easy way to make a difference.

Are you looking for ways to shrink your carbon footprint?

Replacing plastic bottles with long-lasting BRITA bottles and corresponding accessories is an easy way to make a difference.

Customisable BRITA bottles

Make your BRITA bottle your very own.

Imagine. A high-quality bottle on a meeting or restaurant table, bearing your company name or logo. What better way to enhance your image or raise awareness of a particular message?

Our glass designer bottles come in a variety of sizes and styles. So, you'll be sure of finding the right option for your organisation's needs and culture. And reusable bottles are a super way to communicate your commitment to the

environment. Eliminating single-use plastic bottles reduces carbon emissions and makes a statement. Now, more than ever, that's something your employees, guests and clients will recognise and appreciate.

Of course, giving up pre-bottled drinks doesn't mean giving up refreshment! Our dispensers simply and efficiently chill water on demand.

The one-stop shop

For all your drinking water supply needs.

BRITA water dispensers give people around the world refreshing, filtered water day in, day out. But we don't only supply the equipment. We install, maintain and keep your dispenser clean. Replace filters and adjust settings with our state-of-the-art BRITA Dispenser iQ Connect App. Your advantage? Precise diagnosis and error solving, leading to faster service resolution. One small app, but a significant step towards higher service quality!

We also offer financing, rental options and we're always on-hand to answer questions.

With a customised, comprehensive service package, you can enjoy our solutions with total peace of mind.

 BRITA

+44 345 674 9655 | Contact us today and let's talk about your BRITA water dispenser solution | www.brita.co.uk/water-dispensers

We're here for you

Throughout the dispenser lifecycle.

Safety through maintenance

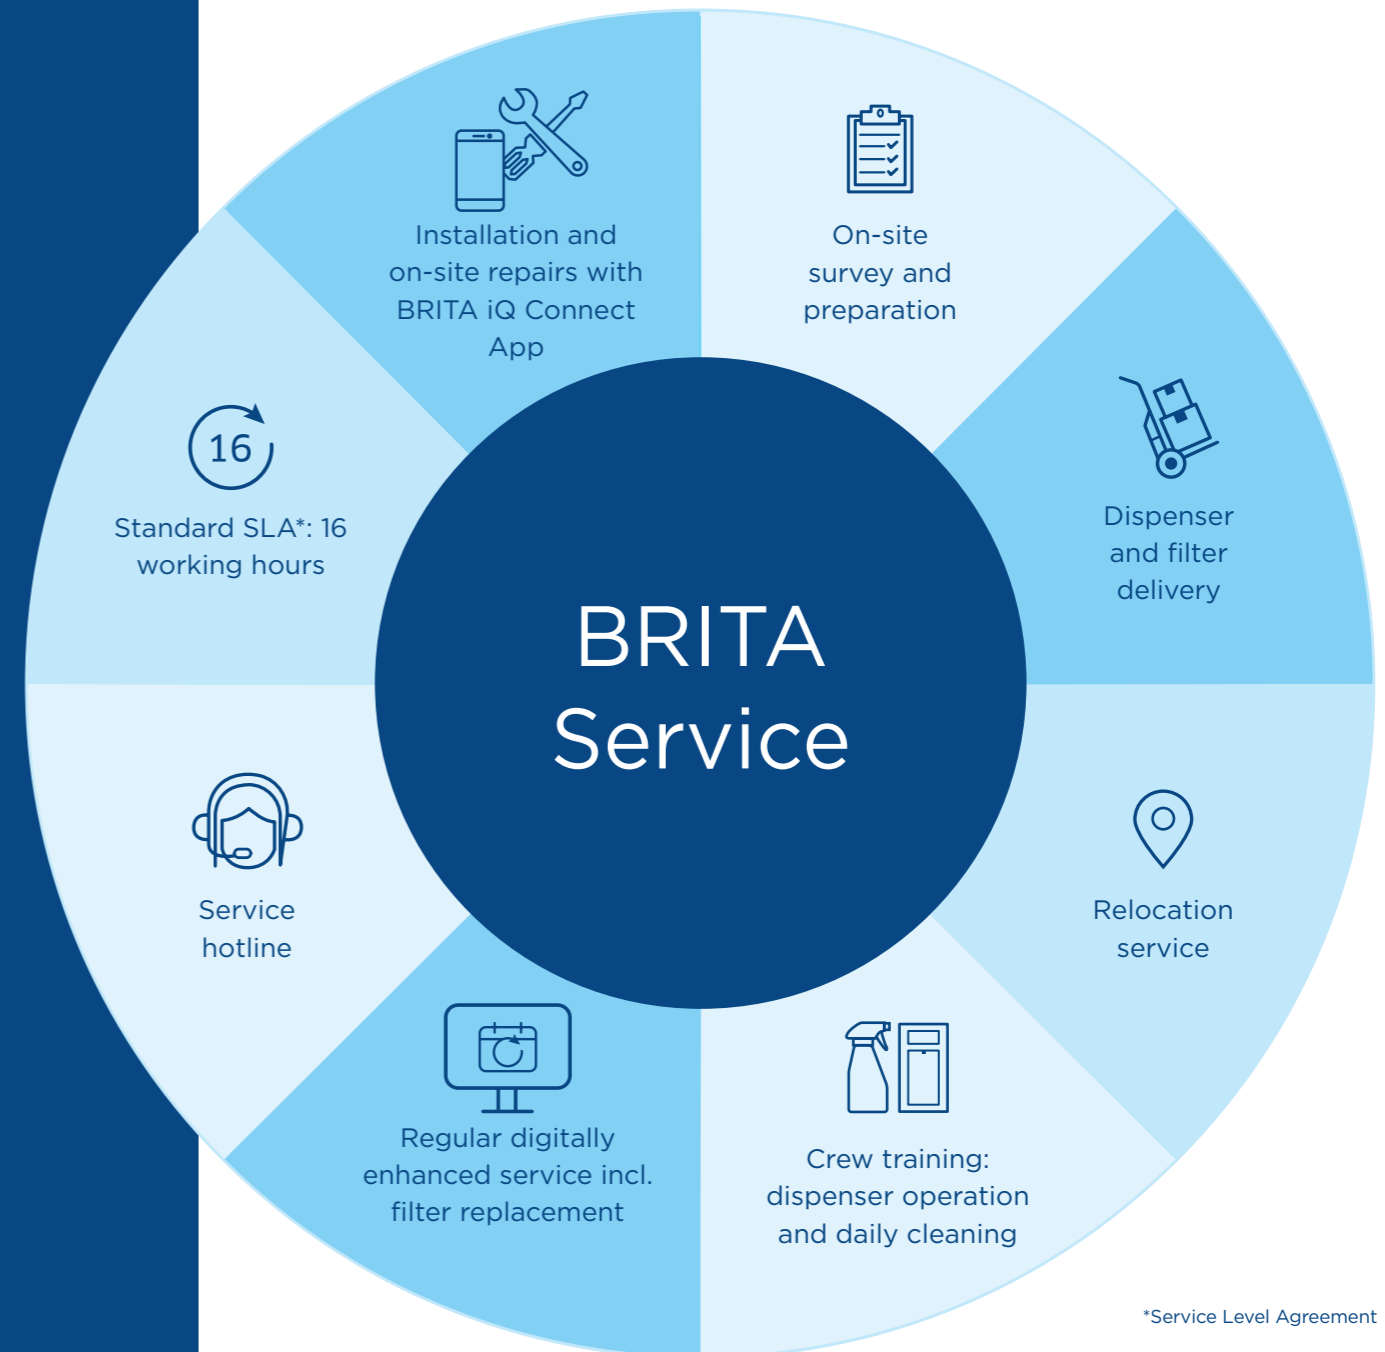

Regular, thorough maintenance is essential for first-rate hygiene. We service our dispensers 1-2 times a year as standard. And with our BRITA Dispenser iQ Connect App we will ensure a higher service quality due to clear dispenser data analysis. Our rental and full-service contracts cover any repairs made during the dispenser's guarantee period (5-10 years).

Reliably high service quality

Our employees are audited regularly. A supervisor will visit you, make sure you're satisfied and confirm our service engineer has done a good job. We give our staff top marks - but it's good to know customers agree! Our training programmes ensure our service quality gets better and better.

Advice and more - on tap!

Our service engineers and customer service agents work hard to make sure you're completely satisfied. We can answer any questions you have during on-site visits or via our dedicated hotlines.

*Service Level Agreement

BRITA Service benefits

What you get from our full-service maintenance offering.

1. Cleaning

- Dispenser (interior/exterior) and base cabinet (for floorstanding dispensers)
- Chemical cleaning of all parts that come into contact with water
- Cooling unit fan and ventilation grille
- Drip tray and drain hose (where applicable)
- Dispenser tap and buttons or glass control panel

2. Visual inspection

- Robustness of dispenser and accessories
- Heat exchanger (cooling)
- Any exterior damage
- Any worn / defective parts
- Any potential leaks
- CO₂ hoses

3. Filter replacement

- BRITA filter(s) is replaced

4. Function test

- Set pressure / water (water pressure and pressure regulator)
- Function of the solenoid valves (timing)
- Carbonator-unit sensor probe
- Water meter check with digital/analogue documentation
- Buttons or touch display
- Temperature of dispensed water (cooling)
- CO₂ content (visual inspection of a glass of dispensed water)
- Flow rate of sparkling / still water
- Electronics (in line with local requirements)
- BRITA ThermalGate™
- Safety valve of the carbonator-unit
- CO₂ pressure hose (CO₂ bottle / pressure regulator)
- Cooling unit

5. General

- Refresher training sessions for staff (optional)
- Digitally enhanced service with BRITA Dispenser iQ Connect App due to clear dispenser analysis
- Digital documentation of completed tasks

Water dispenser solutions for your organisation - and a better tomorrow

Watch our Video on Youtube 

Reliable excellence, made-in-Europe quality

Filters developed and manufactured in Germany, dispensers assembled in Italy.

Dependable hygiene

Proven expertise in the healthcare sector based on 20+ years' experience.

Efficient, cost-effective, convenient

Easy to use, lower costs for you and the planet.

Working for greater sustainability

Enabling your organisation to reduce its carbon footprint.

A complete, one-stop solution

Customised products, installation, maintenance, financing and more.

Individual customer focus and flexibility

Meeting all your organisation's specific drinking water needs.

A focus on health and wellbeing

Water dispensers encourage hydration, helping people feel - and perform - at their best.

Outstanding water filtration, created by BRITA

In the business of smarter drinking water choices since 1966.

Sustainable drinking water solutions

Sustainably-designed, long-lasting products cut out the costs and emissions of single-use plastic bottles.

Stylish, user-friendly design

Easy to use, easy on the eye: our innovative product design delivers water that tastes as good as it looks.

Long-term, unique partnerships

From customised solutions to service options to financing – we're the one-stop shop for all your drinking water supply needs.

Filtration power: the heart of dependable hygiene

Decades of filtration innovation and healthcare expertise combine to meet stringent hygiene requirements.

Made-in- Europe quality

Our family business draws on over 50 years' experience to design and build our pioneering products. We develop and make filters in Germany, our dispensers in Italy. We engineer and manufacture our products ourselves. This means we can ensure exceptionally high quality, and scale production in line with demand.

Our manufacturing plants - including one opened in 2018 - work with maximum energy efficiency through use of advanced technology.

BRITA staff are skilled and dedicated. They complete many tasks by hand, so a high degree of craftsmanship goes into each dispenser. But the latest technology also belongs to our working tools. For example, ergonomic lifting aids and tablets that display instructions. Hololens headsets help workers in Italy quickly resolve any issues. They direct questions straight to the headquarters team and get answers back in real time.

Watch our Video on Youtube 

+44 345 674 9655 | Contact us today and let's talk about your BRITA water dispenser solution | www.brita.co.uk/water-dispensers

Sustainability comes naturally

Acts, not words, have always been our focus regarding sustainability. In 1992 we developed the first recycling process for filter cartridges. Since then, we've applied our ingenuity to develop smart innovations for the good of both people and planet. We're happy to pass on the benefits to our customers and create a positive ripple effect.

Reduce, reuse, recycle

Reduce: We've lowered water consumption at our factories by reusing grey water. And we take care to use as little plastic as possible throughout the value chain.

Reuse: We consistently recycle filter materials – and have done so for more than 25 years. The ion exchanger from our used filter cartridges within our hot water dispensers is reactivated in our own regeneration plant and reused in BRITA products.

Recycle: We're working on recycling and alternatives to thermal incineration. This will reduce emissions from the end-of-life disposal of our products.

Work with like-minded suppliers

We look across our entire business, constantly reviewing how we do things. And then we see where we can make changes.

For example, in the UK our dedicated "Green Teams" promote better waste management. In our headquarters in Germany, we provide free green electricity for battery-operated vehicles. And since 2015, we've used energy-efficient technologies within our factories in Germany, Italy and the UK.

Small changes, big impact

We've decided to focus on plastic waste: an issue where we can make a difference. We're in a long-standing partnership with Whale and Dolphin Conservation, working to reduce plastic in the environment.

506kg less plastic waste

per year when a company with 100 employees uses a dispenser rather than plastic bottled water*. This is the equivalent weight to a new-born grey whale.

*Bavarian State Ministry of the Environment and Consumer Protection, 2016

Less plastic is more

Freshly filtered water from a BRITA water dispenser can make a huge difference to the amount of waste your organisation produces. And that's on top of the negative environmental impact from the production, transport, collection and recycling of bottled water.

At BRITA, we're committed to reducing single-use plastic. Combine our water dispensers with top quality reusable bottles, for a sustainable solution that's perfect for your organisation.

More than 5 billion plastic bottles

saved each year when people drink from a BRITA product instead

= more than 35 times the equator (1-litre bottles stacked on top of each other)

= enough bottles to fill more than 15 cargo ships (based on total litre volume)

Reducing our carbon footprint

The other side of the Planet Contribution is the CO₂ emissions from our own operations. Some emissions produced from materials and production through to disposal are unavoidable. We try to make up for these with many eco-friendly initiatives. But other emissions can be reduced, and we're determined to seek out a better way.

Each year, we assess our company carbon footprint following the Greenhouse Gas Protocol (GHG) Standard. External experts help us ensure that our reporting quality, level of transparency and accuracy are always state-of-the-art. And we're making progress. Based on the 2021 BRITA footprint we've reduced our total emissions (Scope 1+2+3) by 10.8%. Compared to 2019, emissions per filter cartridge sold went down 20% while emissions per filter cartridge produced decreased by 13%. That means our emissions are growing at a slower rate than our business. It's not yet perfect, but it does show we're succeeding in decoupling growth from emissions.

At BRITA, we use 100% green power for manufacturing in the UK and Germany. And the innovative speed-fit doors in our warehouses reduce power and heating costs. The simple step of using a renewable energy provider decreases the carbon footprint of your BRITA water dispenser by a further 5%.

+44 345 674 9655 | Contact us today and let's talk about your BRITA water dispenser solution | www.brita.co.uk/water-dispensers

A closer look at the dispenser lifecycle

1. Purchase of materials and pre-production

More than 70% of our product components come from European suppliers, reducing their overall carbon footprint

2. Transport

We lower emissions from product transport through smarter purchasing decisions which minimise transport distances

Our water dispensers produce 86 % lower carbon emissions* than bottled water and 64% less* carbon than bottled water dispensers

3. Production at BRITA

We use certified green electricity at our European production sites in Germany and the UK. So, most of our indirect energy needs are met by renewable sources

6. Disposal

When our water dispensers reach the end of their long lifetime, the dispenser system is shredded, and the raw materials recycled responsibly

5. Customer use

BRITA products help our customers to cut costs, waste and carbon emissions associated with single-use plastic bottles

4. Packaging

We've replaced the bubble wrap and foam packaging of spare parts with eco-friendly paper alternatives and only use cartons made from 80% recycled materials

EcoVadis Silver Medal

In 2022, EcoVadis awarded us with a silver medal for business sustainability. This puts BRITA in the top 20% of the 100,000+ companies assessed by EcoVadis – the largest and most trusted supplier of sustainability accreditation.

We're proud of this award, of course. But it also points to areas where we can do even better. In the upstream supply chain, and even better downstream, shaping sustainable solutions for today and tomorrow.

BRITA strengths across the 4 EcoVadis themes

Environment

- Renewable energy: 70% + of BRITA Group's total electricity requirements from renewable sources
- ISO 14001 Environmental Management certified
- Product takeback programmes and recycling: e.g., 100% of ion exchange resin from BRITA Professional filter cartridges returned to the cartridge cycle

Labour and Human Rights

- Policy on diversity, discrimination, child labour, working conditions, employee health and safety
- Implementation of a works council
- Employee satisfaction survey

Sustainable Procurement

- Supplier assessment to REACH requirement
- On-site audits of suppliers on environmental and social issues
- Integration of social or environmental clauses into suppliers' contracts

Ethics

- Policy on anti-corruption and bribery issues including approval procedure for sensitive transactions
- Policy on anti-competitive practice issues such as price fixing or bid rigging
- Awareness training on ethics issues for employees

A complete, one-stop solution

Dispenser

Wide selection of models dispensing choice of water types

Filter

Find the best high-quality BRITA filter for your needs

Expert advice

Our knowledgeable sales consultants advise you on-site or by phone

Hygiene and Safety

Optional built-in feature for even greater hygiene

A 360° Solution

Financing options

Attractive options to rent or buy

Bottles

Range of styles and sizes, all customisable e.g., with your logo

Service options

Installation service, maintenance service

Accessories

Tailor-made bottle crates, washing accessories, cleaning supplies

Benefits of BRITA Dispensers

- Sustainability champion: 86% less CO2 emissions compared to pre-bottled water*
- Manufactured sustainably: production plants in UK and Germany powered by certified renewable sources of energy, energy-efficient technologies used in all BRITA factories, water consumption at factories reduced through reuse of grey water
- Sustainable in use: BRITA dispensers designed with sustainability in mind (R290 natural refrigerant, stand-by mode, adjustable temperature setting)
- Durability: BRITA dispensers designed to be repaired or refurbished
- Individual settings: individual temperature adjustment on all dispensers can further reduce energy consumption
- Convenience: pre-programmable portion setting and water temperature
- Less limescale, more taste for hot water dispensers: proven BRITA filtration technology ensures excellent-tasting cold and hot water and prevents limescale. Just 1mm of scale build up results in 7% higher energy costs
- Safe and hygienic: BRITA dispensers tested to the highest level. For example our BRITA HygienePlus solution complies with the stringent food hygiene standards and microbiological specifications of the German Drinking Water Ordinance
- Reliable protection: BRITA filtration expertise in dispensers offers excellent protection against unwanted substances and organisms that can be found in mains water
- Premium Design, made in Europe: Made-by-BRITA quality, all filters manufactured in Germany, dispensers assembled in Italy

* Calculation based on Top Pro (medium cooling capacity)

What do our customers think?

Using the BRITA system meant that we didn't have to transport pre-bottled mineral water, which has helped us reduce our carbon footprint.

Brand Manager for ACS | University of Sheffield
Katie Butler

The unique branded bottles with our name and logo really set us apart from other venues. Guests have often commented positively on their look-and-feel. Some have even asked if they could buy bottles.

Managing Director | Spreespeicher Event
Robert Hoyer

I think part and parcel of the original plan to involve BRITA was its environmental friendliness. And the project was very successful.

Contracts Manager | Springer Nature
John Haskell

I chose BRITA because they are a market expert. I felt that they had the right calibre and standards for BNP Paribas.

Hospitality & Catering Manager | BNP Paribas
Michael Flatter

We now have no deliveries of bottles of water coming in, and therefore no wasted plastic or glass. We are no longer wasting energy by boiling more water than we need or having to run the tap to wait for it to get cold.

Site Facilities Manager | Jewish Care
Lindsay Forrest

Our guests are delighted to be served our new "Georgenthaler water" (BRITA filtered tap water). And we have cut costs by a third.

Executive Assistant | Hotel Hofgut Georgenthal
Peggy Scheiding
