AquaGusto

A practical filter solution for coffee and espresso machines with water tank

Whether in HoReCa or in the office, the BRITA AquaGusto water tank filter will enhance the flavour, aroma and appearance of coffee. And, of course, that also applies to espresso and cappuccino. The filter can be used in almost any coffee machine and reduces limescale deposits. It is impressively simple and quick to operate, and users also benefit from the added filter exchange signal.

Forgetting to change the filter is now a thing of the past. The filter change signal means you always know the right time to change the filter. Simply place the filter change signal in a visible location and press the button firmly.

The benefits to you

- Can be used in all conventional water tanks: no adapter, no assembly
- Easy to use: simply place in the tank and allow to stand
- Including automatic filter change signal – for better service
- Simple and immediate filter installation and exchange by the user
- Enhanced coffee flavour, aroma and appearance
- Reduces limescale deposits
Versatile operation

AquaGusto filters are suitable for use in all coffee machines with a water tank.

Using the filter exchange display

Stick the filter exchange display to the water tank and press the start button firmly.

When a red line is visible, the filter exchange display is activated.

The red zone extends over time until the maximum period of use has been reached.

After approx. six months, the maximum period of use has been reached and the filter must be exchanged.

Explanatory notes

* The capacities given have been tested and calculated on the basis of normal application and machine conditions. Due to external influences (e.g. varying water quality, usage and/or machine type) deviations from these results can occur.

Only drinking water quality may be used as the water supply for BRITA water filters.
