Experience unique quality

Specially developed for catering and vending sectors, the PURITY C Quell ST filter cartridges reduce carbonate hardness in drinking water and, therefore, reduce the danger of limescale deposits in equipment. In addition, the filter medium retains metal ions, such as lead or copper, and also reduces substances that can negatively affect taste and aroma (such as chlorine residues).

The benefits to you

- Limescale deposits and the associated machine breakdowns are reduced including additional service and repair costs
- The removal of unwanted taste and aroma elements in the filtrate (and also in the bypass water) for optimum quality of the end product
- One filter head concept for all cartridge versions in the PURITY C range with various head designs for individual requirements
- Simple to handle with rapid-change system including an innovative locking handle for reliable adjustment
- Integrated flush valve for easy operation and space-saving thanks to the water inlet and outlet on one side of the filter head

Environmental protection and recycling are part of the BRITA corporate philosophy. BRITA established a recycling programme for exhausted filter cartridges. Since 1992 all parts of BRITA cartridges can be completely reprocessed so that the materials can be recycled.

Experience unique quality

PURITY C Quell ST

Specially developed for catering and vending sectors, the PURITY C Quell ST filter cartridges reduce carbonate hardness in drinking water and, therefore, reduce the danger of limescale deposits in equipment. In addition, the filter medium retains metal ions, such as lead or copper, and also reduces substances that can negatively affect taste and aroma (such as chlorine residues).
Systematic filter technology

1. **Pre-filtration**
   A pre-filter retains coarse particles.

2. **Carbonate hardness reduction**
   The PURITY C Quell ST filter medium reduces carbonate hardness. As a result, unwanted limescale formation is prevented.

3. **Activated carbon filtration**
   All of the water – including the bypass water – runs through an activated carbon filter, so substances that have an adverse effect on the taste and aroma are removed.

4. **Non-electric pump**
   At the end of the filtration process a fleece retains any fine particles.

---

### Quality and safety

**Optimum water quality**
Outstanding and consistent water quality – free of unwanted taste and aroma elements.

**Maximum product safety**
For uninterrupted operation and safe use.

**Simple to use**
Operation is simpler and easier than ever.

The food safety of BRITA Professional water filter products is tested and monitored by independent institutes.

Comparable capacity according to DIN 18879-1:2007: The comparable capacity is a standardised indicator to facilitate comparison of different filters. The comparable capacity is determined under extreme conditions. Normally the usable capacity in practical operation is clearly higher than the comparable capacity and may vary greatly depending on the usage conditions.

- **Comparable capacity**: 435 l / 1,278 l / 2,066 l / 4,125 l / 8,670 l
- **Max. operating pressure**: 60 l/h (0.25 bar) / 100 l/h (0.5 bar)
- **Water intake temperature**: 8.6 bar / 4 – 30 °C
- **Nominal flow (Pressure loss at nominal flow)**: 1.0/1.6 kg / 1.8/2.8 kg / 2.8/4.2 kg / 4.6/6.9 kg / 7.7/12.5 kg

- **Dimensions (W/D/H) with filter head**: 119/108/268 mm / 117/104/419 mm / 125/119/466 mm / 144/144/557 mm / 184/184/557 mm
- **Weight (dry/wet)**: 1.0/1.6 kg / 1.8/2.8 kg / 2.8/4.2 kg / 4.6/6.9 kg / 7.7/12.5 kg

- **Connections (input/output)**: G 3/8” or John Guest® 8 mm (JG 8)
- **Operating position**: horizontal and vertical / use after inhouse softening units possible

**Appropriate hoses and hose sets from our comprehensive FlexConnect range as well as other accessories can be found in our price list.**

---

**Explanatory notes**

1. The capacities given have been tested and calculated on the basis of normal application and machine conditions. Due to external influences (e.g. variations in raw water quality and/or machine type), deviations from these results can occur.

2. For coolers
3. For coffee machines and vending machines
4. Can be used flexibly for all applications

*applies to all materials in contact with water
